Path of a dynamic particle in the direction of a charged particle of equal charge
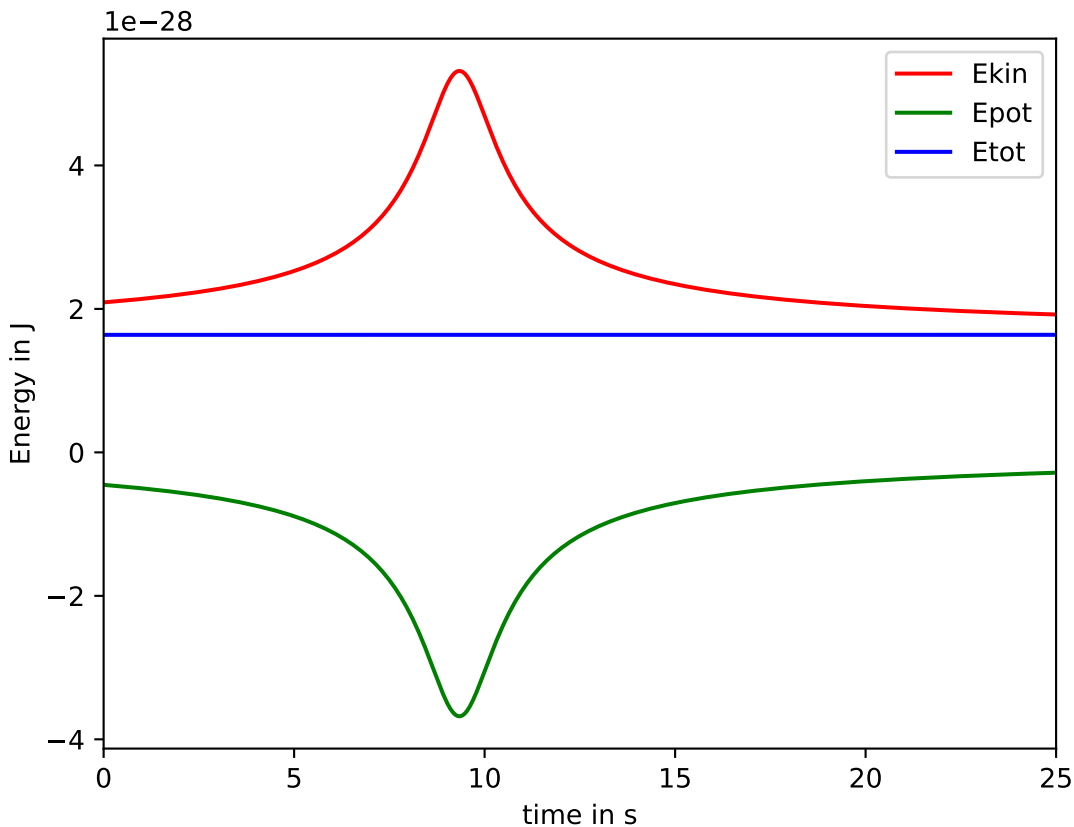

The total, kinetic and potential energy for a dynamic particle shot towards a charged particle with equal charge
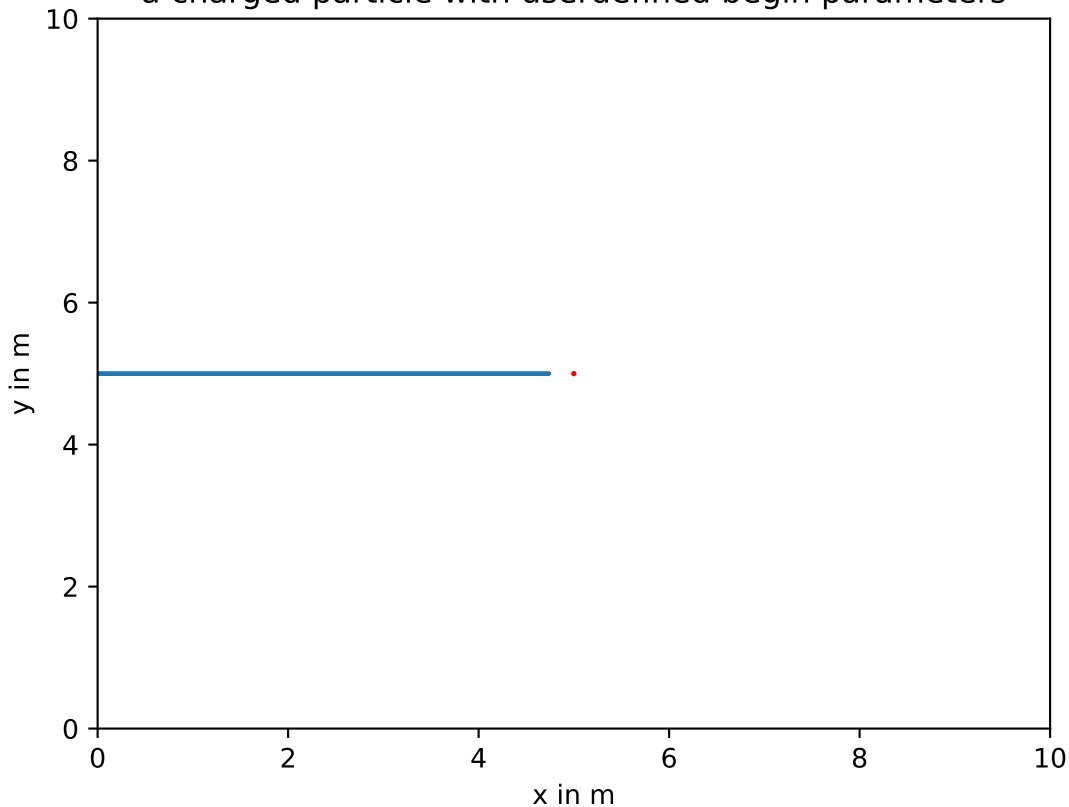

Path of a dynamic particle in the direction of a charged particle of opposing charge
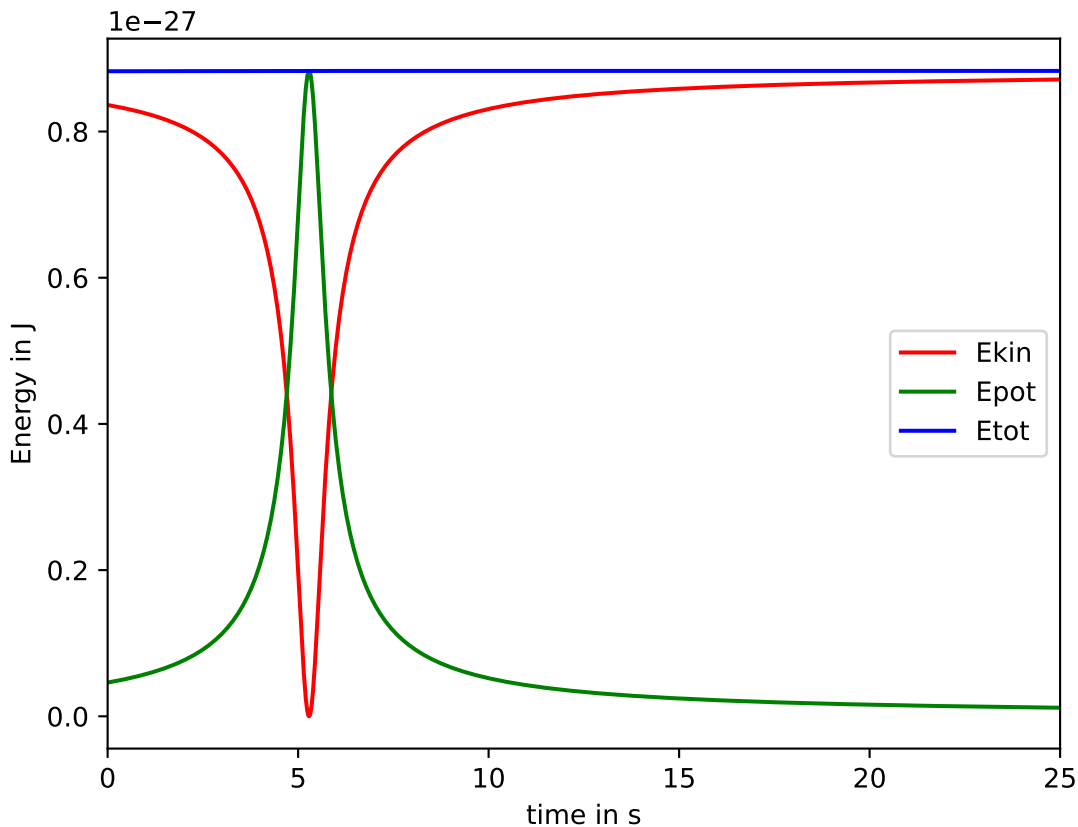

The total, kinetic and potential energy for a dynamic particle shot towards a charged particle with opposing charge
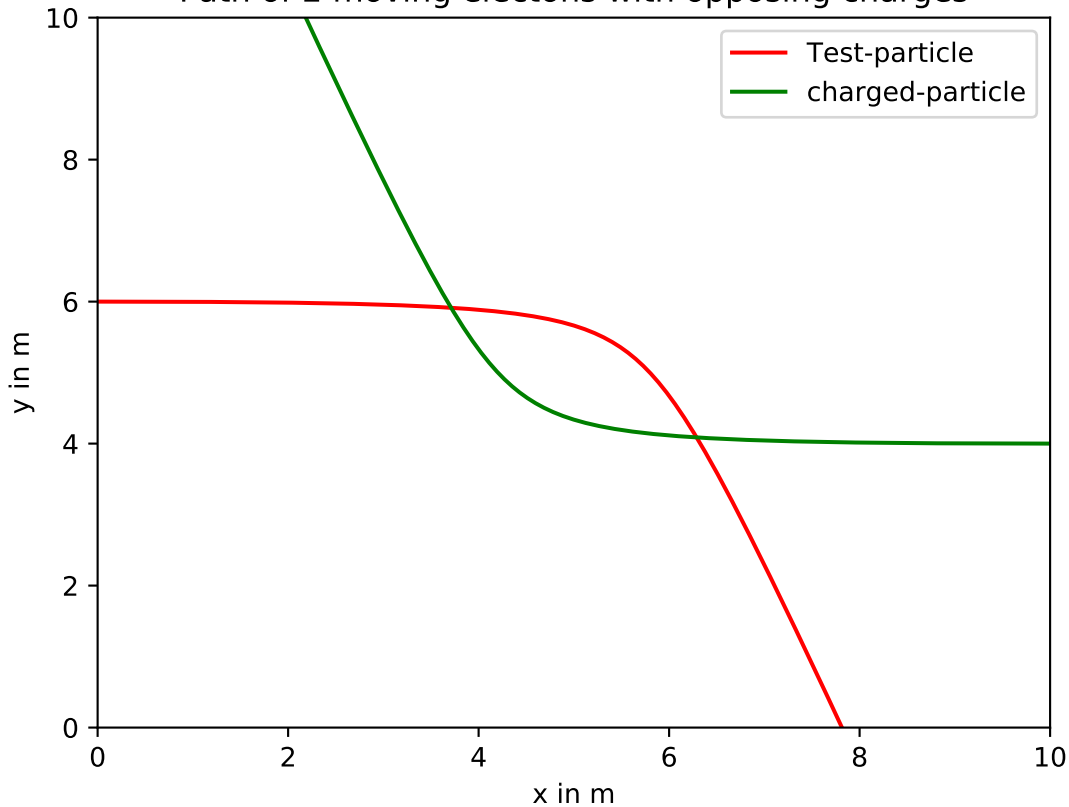

Path of a dynamic particle in the direction of
a charged particle with userdefined begin parameters

The total, kinetic and potential energy for a dynamic particle shot towards a charged particle, userdifined parameters
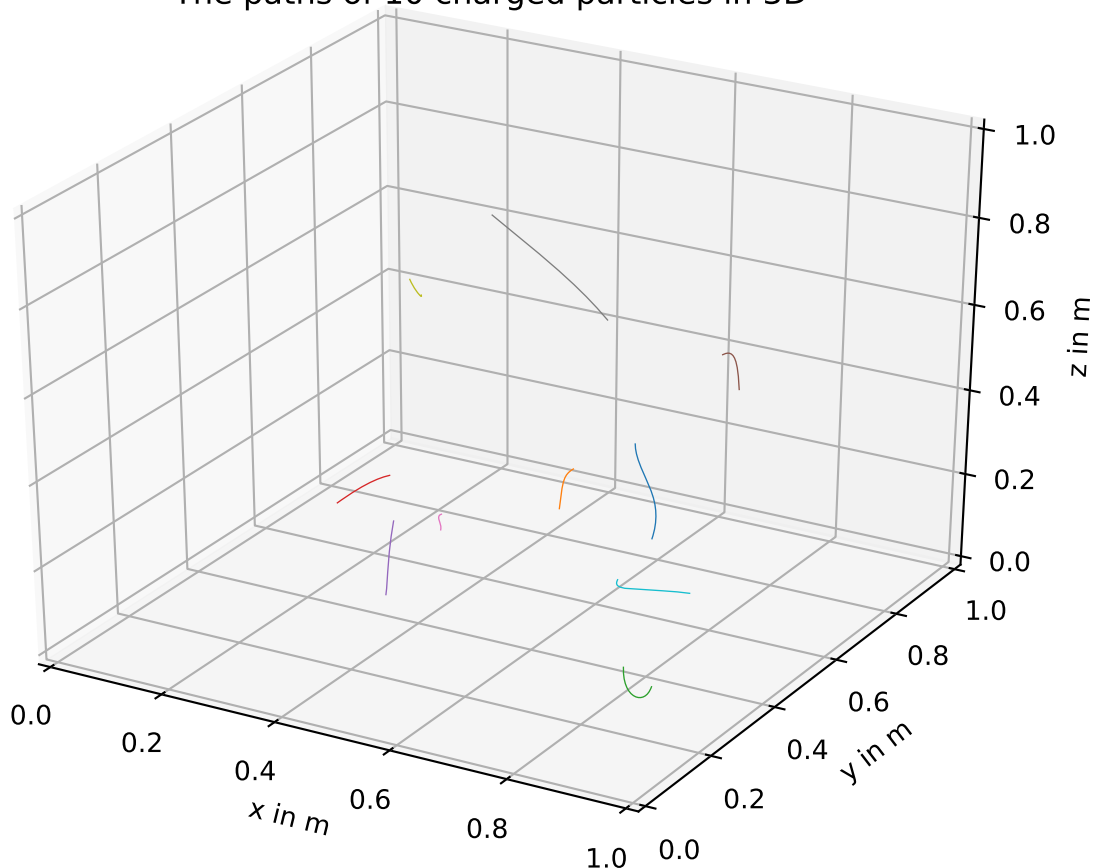

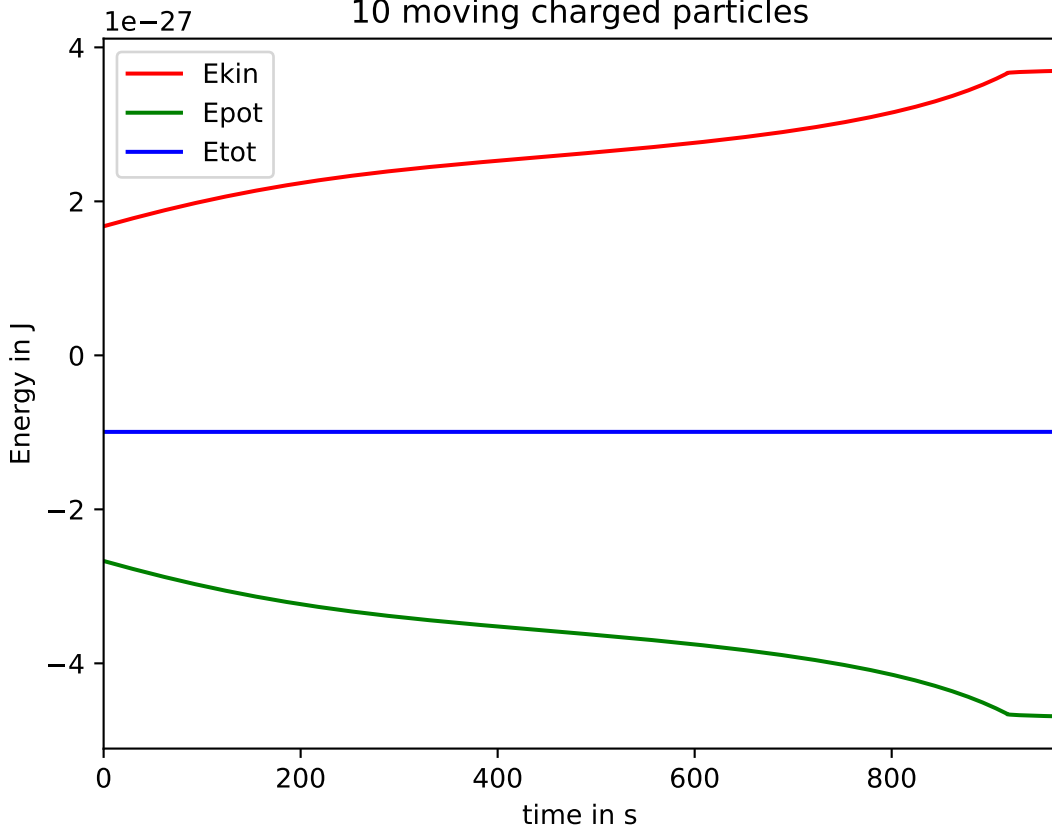

Path of 2 moving electons with opposing charges

The kinetic, potential and total energy of 2 moving electons with opposing charges
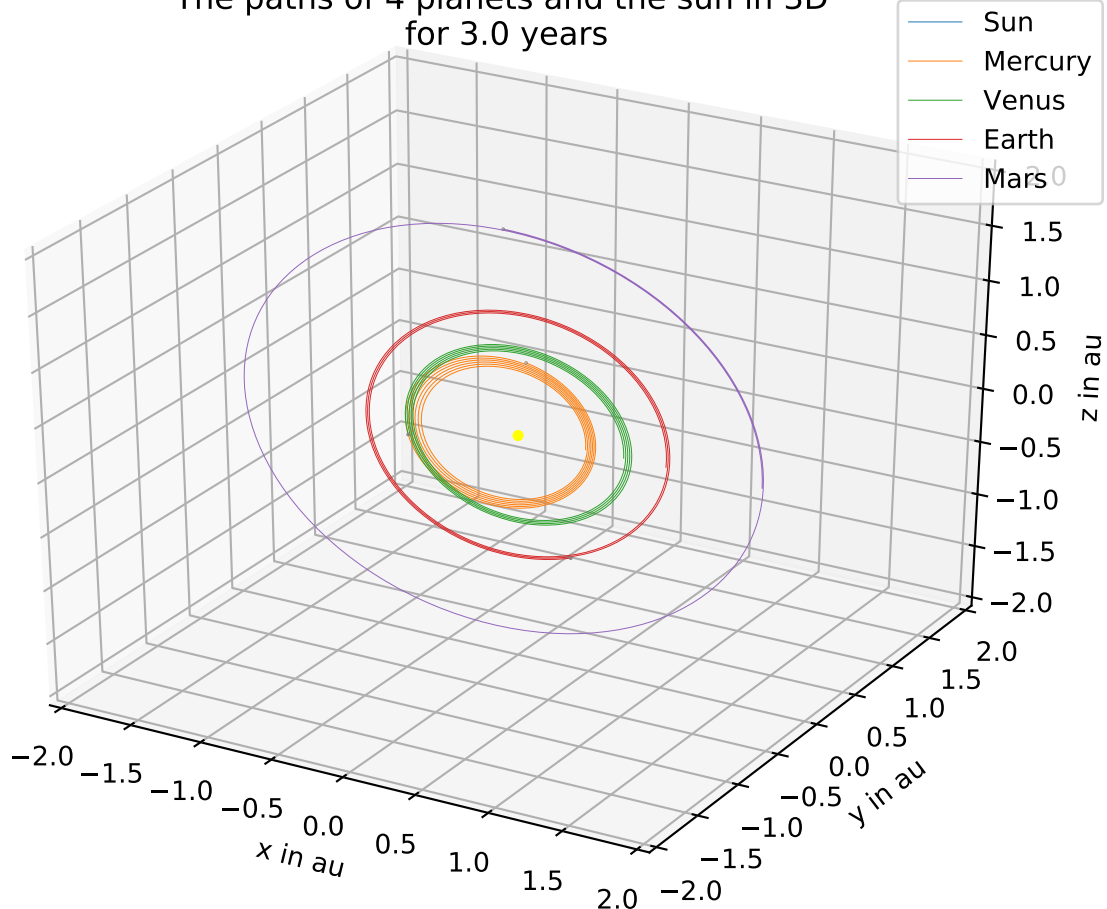

The paths of 10 charged particles in 3D

The kinetic, potential and total energy of 10 moving charged particles

The paths of 4 planets and the sun in 3D
for 3.0 years

The kinetic, potential and total energy of
5 moving charged particles for 3.0 years
